

2.12 Connection of Peripherals

2.12.1 Connection of Peripherals

BGM/MOH

The Hybrid IP-PBX provides Background Music and Music on Hold. Up to 2 external music sources (e.g., user-supplied radios) can be connected to the Hybrid IP-PBX.

CAUTION

- Wiring should be done carefully to prevent undue force being exerted on the plug. Otherwise, sound may only be heard intermittently.
- External Music Jacks are SELV ports and should only be connected to approved SELV devices.

Note

When the Hybrid IP-PBX and external music sources are not connected to the same ground, hum noise may be induced into Background Music and Music on Hold.
